

Shimadzu UV - 1201 Spectrophotometer

Item Number: 1560

Manufacturer: [Shimadzu](#)

Model: UV - 1201

Condition: Used

Power Supply: 100-120 / 200-240 V, 2 / 1 A, 50, 60 Hz

Specifications:

himadzu UV 1201 UV/Vis Spectrophotometer. 200-1100 nm wavelength range. Split beam photometric system. Absorbance range -0.3 to 3. Transmittance range 0 to 200%.

- Faster, more convenient testing for the busy analyst . . .
- Convenient, pre-measured reagents.
 - Simplified methods with proof of accuracy.
 - Built-in timer for color development.
 - Determine up to 22 analytes or more with custom equation.
 - Increase productivity with the six - cell position transport.
 - Adjustable large LCD display for optimizing view angles and contrast
 - Wavelength range: 200 to 1100nm, in 0.1nm increments
 - Spectral Bandwidth: 5nm
 - Wavelength Accuracy: +/-1nm
 - Wavelength Reproducibility: +/-0.3nm
 - RS 232C interface
